AARJAV JAIN, MANCHESTER, +44 7411480391 AARJAV.JAIN@GMAIL.COM

Aarjav Jain

First-Class Theoretical Physics Masters graduate from University of Cambridge, Working as a Full-Time software engineer at THG. Accepted first author for NeurIPS 2022 workshop paper, ArXiv link: https://arxiv.org/abs/2212.05892

SKILLS SUMMARY

- Programming: Python, Java, Javascript, GCP, Docker
- Python & ML libraries: Pandas, JAX, TensorFlow
- Research, Technical writing and presentation experience
- Skill and interest in Mathematics & ML
- Teamwork experience in a technical environment

EDUCATION

UNIVERSITY OF CAMBRIDGE – MSC PHYSICS – 2018 - 2022 – CLASS 1

- Achieved First Class an overall grade of 72% in my MSc (all with in-person, closed book exams). On my Exoplanets paper, I got 88%, and 76% in a theoretical physics paper (Quantum Field Theory)
- Achieved 75% in MSc thesis on Deep Learning: 'Using neural networks to learn, embed and plot metric spaces under Ricci flow'. Accepted by NeurIPS 2022 workshop: ML in the Physical Sciences. Worked in Python with JAX & TensorFlow.

KING EDWARD ASTON IV GRAMMAR SCHOOL – 2011 - 2018

- 4 A* grades in A-Level Maths, Further Maths, Physics and Chemistry
- Gold in UKMT Maths Challenge and Kangaroo, Silver in British Physics Olympiad

EXPERIENCE

ML ENGINEER – THG – REMOTE – APRIL 2023 - NOW

Lateral transfer to ML team. Deployed SpellChecker model API to GCP Cloud run

SOFTWARE ENGINEER – THG – OCT 2022 - MARCH 2023

Includes 6 months of extensive Software engineering training. Worked in Python and Java. Lead a team of 5 to create a sales dashboard using React and Javascript.

ML RESEARCH INTERN – FARADAY INSTITUTION – SUMMER 2021

Created surrogate models for the thermal runaway (explosion) of LI-Ion batteries using Gaussian processes using battery fatigue data, cutting computation time by 95%. Prediction of battery reaction parameters allowed a simpler model expression. Listed as 3rd author in the paper subsequently published.

PROJECTS

- Undergraduate project on modelling n-body orbit in Python, solving large ODE system and testing solution stability and initial condition sensitivity
